

Verstraete.team - BIM-Specialist - Pune (India)

BIM Specialist - Region of Pune (India)

Change the world of construction through 4D and 5D -BIM

Join us on this transformative journey as we continue to push boundaries, redefine possibilities, and shape the future of construction through the power of BIM.

Our company goal and why you should be part of this team!

Welcome to Verstraete.team, the leading and most innovative company in the construction industry in Belgium. With our strong focus on BIM-integration, we are revolutionizing the way construction projects are designed, calculated and coordinated. When it comes to BIM-integration and innovation, Verstraete.team stands out as a true leader in the construction industry.

We are setting up an Indian team of BIM-experts, so together we can

- disrupt the world of construction even further, starting with Belgium. Next we take on the world!
- stand out as BIM-modelers (3D), BIM-planners (4D) and BIM-cost estimators (5D)

At Verstraete.team, we understand the power of Building Information Modeling (BIM) and its ability to enhance collaboration, improve efficiency, and minimize risks in the construction process. With our unwavering commitment to leveraging BIM technology, we have established ourselves as pioneers in the industry, constantly pushing boundaries and setting new standards.

Our team of highly skilled professionals combines extensive experience in construction with a deep understanding of BIM methodologies. We believe that integrating BIM into every aspect of a project brings about significant benefits and unlocks tremendous potential for success.

As a testament to our commitment to excellence, Verstraete.team has earned a stellar reputation in the construction industry. We have successfully completed a diverse range of projects, from small-scale developments to large, complex structures, leaving a lasting impact on the built environment.

The roots of Verstraete go back to 1820. Verstraete has tradition that builds her future on innovation and team. Read the mission, vision, strategy and value of Verstraete and check if this is something for you!

What do you bring?

To establish this team we are open to

- either experienced BIM-specialists, as well as young potentials and future BIM-believers with an international mindset.
- You must have, at least, a **technical bachelorsdegree or master in the field of construction**
- You have a **strong interest in 4D or 5D-BIM** (either by proven experience or previous internships)
- **Very proficient in English** as this will be the language to communicate with your colleagues
- Ideally, you also have strong computer skills in either softwareprogramming or business analytics such as PowerBI.

What's in it for you?

Besides working for a leading and innovative company in construction?

- A chance to develop and excel in the challenging field of BIM and reshape the futur of construction
- In case of a workagreement, you will receive a training in Belgium for 3 to 6 months and then you will be working from India (region: Pune) in close collaboration with the team in Belgium.
