

Verstraete.team – Construction site coordinator

Your challenge

As a site coordinator, you will spend **100% of your time on site**. You will work, together with your team, on the erection of unique construction projects, including structural work and finishing of apartments, residential care centers, villas and office buildings.

You enjoy working actively with the team and additionally take responsibility for planning, calling in materials and coordinating subcontractors.

You oversee a qualitative execution within the proposed execution time and you also contribute to a safety culture on and off site.

You are the point of contact for the architect, principal and all parties involved. You are supported by the project leader and can also call upon the full team of fellow site coordinators.

Expectations?

- You have gained relevant experience on site and are able to lead a team of masons, form setters and subcontractors on site.
- If you value values such as respect, open communication and ownership, you are already cut from the right cloth.

What are we offering?

- We work every day to be the construction company of the future: We achieve this through the use of modern technology, BIM, and data, an inspiring workplace and passionate colleagues.
- A workplace where it is pleasant to work: a good logistical organization, cool and competent people and fun projects that you take your friends and family to on weekends, because they are that special!
- Furthermore, you work on challenging projects and have the opportunity to exchange this knowledge in Verstraete.academy.
- A motivating remuneration policy with numerous fringe benefits such as a company car, meal vouchers, a pension savings plan and hospitalization insurance for the family, a bicycle lease plan, etc.
